

CHARCOAL WATER FILTER FOR DRINKING WATER

Guide for Utilization

Objectives:

1. To understand the importance of clean drinking water for good health
2. To know how to make a charcoal water filter by using easily available materials in a village

Target:

Beginning and middle level neo-literates

Applications:

1. Before showing the poster to learners, instructor asks them from what kind of sources they get their drinking water.
2. Show the folded poster opening it from the top to the bottom to attract learners' interest in the steps of filtration, and then explain how to make a charcoal water filter.
3. If possible, demonstrate how to make a charcoal water filter.

THE RIVER AND US

SOURCE OF LIFE, SUPPORT OF LIVING

Guide for Utilization

Objectives:

1. To understand the important role of river water as a source of life and the support of our living.
2. To encourage learners to consider how to utilize river water more fully and effectively in their everyday living.
3. To introduce the idea of the "bird's-eye view" to allow full consideration of our environment.

Target:

Beginning and middle level neo-literates

Applications:

1. Show the poster learners and let them study it for a while. Points of interest and problems are then taken up in question-and-answer and discussion among participants (including instructor).

2. Instructor prompts discussion among learners about some important functions of rivers that make life more convenient and richer.

3. Instructor prompts learners to think about a river near their own village, and how to use it effectively.
